OTHER OUTPUTS

1. **Documentary Film:** Borish, D., Cunsolo, A., ***+Snook, J.**, +Shiwak, I., +Wood, M., Mauro, I., Dewey, C., +HERD Caribou Project Steering Committee, & **Harper, S.L.** (Producers). (2022). Herd (Short-Length; Broadcast Length; and Full-Length). Led by Inuit from the Nunatsiavut and NunatuKavut regions of Labrador, HERD documents, preserves, and shares Inuit knowledge and experiences with caribou, all through the co-creation of community-based documentary film. Between 2016-2022, we talked with, filmed, and photographed over 80 Inuit from across 12 distinct communities in Labrador; we documented caribou and landscapes from various parts of Nunatsiavut and NunatuKavut; and we collected archival multimedia from decades in the past. As a result, we gathered over 100 hours of footage, thousands of photographs, and countless memories from knowledge holders who were involved in this work.
2. **Podcast:** Day, L., Cunsolo, A., Castleden, H., Martin, D., Hart, C., +Anaviapik-Soucie, T., +Russell G., +Paul C., Dewey C., & ***Harper S.L.** (Editors and Producers). (2016). Water Dialogues. This three-chapter podcast is about creating space to share and listen to the stories, knowledge and voices that are too often absent in the discussion around water in Canada. Based on audio-recordings from a national Water Gathering event that brought together First Nations, Inuit, Métis and other Canadian water researchers and experts from across the country, this podcast project explores our conversations around the need to bring our diverse knowledge systems together to address the complex and increasingly critical water issues we face today.
3. **Whiteboard Video:** Saini, M., Rigolet Youth, Roche, S., +Shiwak, I., +Flowers, C., +Wood, M., Edge, V., +Rigolet Inuit Community Government, +Nunatsiavut Government, & ***Harper, S.L.** (Editors and Producers). (2016). "Keeping Stomach Illness Out of Rigolet": A community-based health promotion video. A whiteboard video tool was collaboratively developed by Rigolet youth, community members, the research team and key regional stakeholders to share public health recommendations for reducing the risk of acute gastrointestinal illness. The video debuted in Rigolet at a community event in August 2016 and was later provided online for community members and local and regional health departments.
