2012: Perry Johnson Registrars Carbon Emissions Services (PJRCES)- USA

2012: Hubei Enshi Baoshan Hydropower Plant and Hetaowan Hydropower Plant Bundled Hydropower Project-China

The Supervisory Body of the Article 6.4 Mechanism - Roster of experts

Have selected by the Supervisory Body (SB) to be included in the Article 6.4 mechanism Roster of experts as “Methodologies” and “Climate policy” Expert, for the period of two years from 10 March 2023

- **Reviewer of Climate Change Projects and Proposals seeking finance from The Science and Technology Development Fund (STDF) – Egypt**

2009: Smoke Cloud Control Over Cairo, Egypt

2011: Climate Change Impacts on the River Nile Basin Hydrology

2013: Enhancing Sinai Population: Novel Modification of Soft Asphalt for use in Roadway Network Developments and Infrastructure Applications

2013: Study the Environmental Statues of El-Temsah Lake Using the Amalgamation of Hydrodynamic Simulation Models and Satellite Images Analysis

2013: Marine Invertebrates of Sinai Coastal Area (MISCA)

2013: Study the Environmental Effects of Resettlement Villages Beneficiaries from North Sinai Project on the Water Quality of Suez Canal

2013: Energy efficient appliances for next century

2013: Forecasting the Catastrophic Events that is expected to occur over Al-Arish Valley due to Climate changes within the current Century

2013: Sinai Flash Floods, extensive Meteorological Study in Relation to Solar Induced Climate Change

- **Climate Change Negotiator**, Member of the Egyptian Delegation to Climate Change Conferences and meetings since 2005
- **Climate Change Expert**, contributed to studies and reports related to assessment of climate change situation and impacts in Egypt and other countries of MENA region (Middle East and North Africa)
- Deep experience in climate change related topics, *inter alia* climate change science, **adaptation, mitigation, greenhouse gas inventory**.
- Extensive consulting experience in Nationally Appropriate Mitigation Actions (**NAMAs**), Low Emissions Development Strategies (**LEDS**), Measurable, Reportable, Verification (**MRV**) systems, Sectorial Mitigation Action Plans (**MAPs**), Biennial Update Reports (**BUR**) and Nationally Determined Contributions (**NDCs**) reports
- Extensive experience with **Climate Change international legal instruments** including United National Framework Convention on Climate Change (**UNFCCC**), Kyoto Protocol (**KP**) and Paris Agreement (**PA**)
- Extensive consulting experience in mitigation and Clean Development Mechanism (**CDM**), and **Carbon Market Mechanisms**, member of Egyptian Designated National Authority (**DNA**), responsible for reviewing submitted projects *inter alia*, baseline methodologies, additionality, sustainable development conformity with national criteria, environmental impact assessment, GHG reduction calculations as CO₂ eq.
- **Teaching and training experience**. Participated as a trainer in several workshops with the **UNEP** project CD4CDM, World Bank (**WB**) regional meetings and forums, Islamic Bank for Development (**IDB**), League of Arab State (**LAS**), African Development Bank (**AfDB**) Economic and Social Commission for Western Asia (**ESCWA**), Centre for Environment and Development for the Arab Region and Europe (**CEDARE**)
- 1999-2004: Deputized as a **lecturer** for academic course of "Information System and computer science" for Faculty of Agriculture- Azhar University – Cairo
- Strategic planning/policy development for environmental improvement, development of emission inventories, quantification of uncertainties in emissions, statistical modeling of emissions

Education

2016	PhD. Environmental Research, Ain Shams University - Faculty of Graduate Studies and Environmental Research – Cairo – Egypt. Thesis title: <i>Vulnerability and Adaptation Assessment for Some Vulnerable Sectors in Egypt Using Climate Change Regional Circulation Models</i>
2006	MSc. Environmental Research, Ain Shams University - Faculty of Graduate Studies and Environmental Research – Cairo – Egypt. Thesis title: <i>Utilization of Mathematical Models to Overcome Problems Related to Temperature and Relative Humidity Variations inside Greenhouse</i>
2000	Diploma , Environmental Research, Ain Shams University - Faculty of Graduate Studies and Environmental Research – Cairo - Egypt
1996	BSc. , Computer Science/Mathematics, Faculty of Science, Cairo University, Cairo, Egypt

Experience Record

a) Professional Work

Mar.2019 – Present

Project Manager

Fourth National Communication of Egypt to the United National Framework Convention on Climate Change (NC4Egypt/UNFCCC) Project
 Egyptian Environmental Affairs Agency (EEAA) and
 United Nation Development Programme (UNDP)
www.eeaa.gov.eg and www.eq.undp.org

- The Project is funded by The Global Environmental Facility (GEF)
- Development the Fourth National Communication Report of Egypt to UNFCCC
- Development of National Climate Change Strategy of Egypt
- Development of updated Low Emission Development Strategy of Egypt
- Development of updated Nationally Determined Contributions (NDCs) Report of Egypt
- Development of the Project Document of the 2nd Biennial Update Report (BUR) of Egypt
- The project enables Egypt to prepare and submit its Fourth National Communication to the Conference of Parties (CoP) of the UN Framework Convention on Climate Change in accordance with its commitments as a Party to the Convention as mandated by Articles 4 and 12 of the Convention and subsequent CoP decisions. It updates and strengthen information provided regarding national circumstances, inventories of greenhouse gases, policies and measures undertaken to mitigate climate change, assessments of vulnerability to climate change and steps taken to adapt to climate change, and information on public awareness, education, training, systematic research and observation, and technology transfer. The project also increases the capacity of experts and institutions in Egypt to produce subsequent National Communications that meet all guidelines established by the CoP and that serve as a source of information for national policies and measures to mitigate and adapt to climate change in key economic and social sectors

- The main outcomes of the FNC is to update the National Greenhouse Gas Inventory; to revise, analyze and describe national programs that have aided in the reduction of GHG emissions; to identify policies and measures adopted for different national sectors which, directly or indirectly, have served in the reduction of GHG emissions or in the removal of gases through carbon sinks, as it will include a macroeconomic evaluation of these initiatives; and to carry out evaluations of impacts, vulnerability and adaptation strategy feasibility in priority sectors and systems in the country in the face of variability, climate change and projected extreme events

May.2022 – Sep.2022

COP27 Consultant

United National Office for Disaster Risk Reduction (UNDRR)

Regional Office for Arab State (ROAS)

Responsible for

- *Researches, analyzes and presents information gathered from diverse sources, including the incoming COP Presidencies priorities, strategies and plans for COP 27.*
- *Reviews climate and disaster risk reduction documents and reports; liaises with relevant parties; ensures follow-up actions.*
- *Supports and facilitates workshops, through other interactive sessions and assisting in developing substantive reports and documents.*
- *Supports the development and implementation of the UNDRR COP strategy, including the review and analysis of DRR/climate issues and trends, preparation of evaluations or other research activities and studies,*
- *Organizes and prepares written outputs, e.g. draft background papers, analysis, sections of reports and studies, inputs to publications, etc.*
- *Initiates and coordinates outreach activities, and in-country preparation for and coordination of UNDRR's engagements in the COP, liaising closely with the UNRC office and core COP team*

Jul.2018 – Feb. 2019

Senior Climate Change Expert

Central Department for Climate Change (CDCC)

Egyptian Environmental Affairs Agency (EEAA)

Ministry of Environment (MoE)

www.eega.gov.eg

- Sharing in strategic planning of the Central Dept. of Climate Change in both mitigation and adaptation. Provide technical analysis of GHG Inventory, Nationally Appropriate Mitigation Actions (NAMAs) and Measure, Report and Verify (MRV) national system which support in addressing national policies in climate change
- Represent the Ministry of Environment in High Level meetings related to climate change on the national and international levels
- Contribute in capacity building activities on the national level through the workshops and training sessions organized by the Ministry of Environment for relevant stakeholder ministries and entities (e.g., Ministry of Energy, Ministry of Transport, Ministry of Industry, Ministry of Agriculture, ...etc.) as well as NGOs and Media communities

Jul.2013-Jun.2018

Project Manager

Low Emission Capacity Building Programme

Egyptian Environmental Affairs Agency (EEAA) and UNDP

<http://www.lowemissiondevelopment.org/>

- Development of Low Emission Development Strategy of Egypt
- Development of Carbon Market Readiness Study of Egypt
- Development of Intended Nationally Determined Contributions Report (INDCs) in Egypt
- Development of Mitigation Action Database in Egypt
- Development of 31 NAMAs studies in different sectors (energy, housing, industry, transport, ..) in Egypt
- Development of 7 Mitigation Action Plans for Cement, Iron & Steel and Fertilizer Companies in Egypt
- Development of Low Emission Development Strategy for Tourism Sector in Egypt
- Organizing 25 capacity building workshops on different levels (officials, researchers, professionals, media, ...) attended by 873 participants
- LECB is a capacity building programme implementing in 25 countries and financed jointly by **German Government, European Union, and Australian Government**, the project aims to building national capacities in public and private sectors on Nationally Appropriate Mitigation Actions (NAMAs), Low Emission Development Strategies (LEDS), Measurable, Reportable, Verification (MRV), Mitigation Action Plans (MAP) in specific industries (cement, fertilizer and iron & steel) and developing the Egyptian INDCs (Intended Nationally Determined Contributions) report.

- The project is targeting energy, industry and transport sectors, then the scope has expanded to include renewable energy, oil & gas, housing, tourism, agriculture and waste
- The project manager is responsible for managing daily work of the project, planning, preparing ToRs and contracts for experts, reviewing studies and reports prepared by consultants, and presenting the project in relevant events nationally and internationally
- Reviewing deliverable studies of I/NDCs, NAMAs, LEDS, MAPs and MRV, among the topics to be reviews are the alignment of studies with national strategies e.g., Sustainable Development Strategy, Energy Strategy

2009 – 2013

Mitigation Manager

Central Department for Climate Change (CDCC)

Egyptian Environmental Affairs Agency (EEAA)

Ministry of Environment (MoE)

www.eeaa.gov.eg

- Governmental Officer, represented in the **Egyptian Delegation** to United Nation Conferences and meetings on climate change and related topics
- Responsible for coordination between national ministries/agencies to prepare the national strategy study for low carbon economy to be presented to United Nation Framework Convention on Climate Change (UNFCCC) as National Appropriate Mitigation Actions (**NAMAs**) and Low Emission Development Strategies (LEDS) according to Bali Action Plan (BAP)
- Member of Third National Communication Project Steering Committee
- Deputy Manager of Climate Change Unit, Egyptian Environmental Affairs Agency (EEAA), who is the Focal Point of UNFCCC and IPCC
- Deputy Manager of national climate change projects
- Responsible for reviewing all submitted Project Design Documents (PDDs) and Project Idea Notes (PINs) to the DNA (60 PINs and 17 PDDs), including N₂O abatement, renewable energy, fuel switching, waste heat recovery afforestation and landfill projects, including the fulfillment of the PDD to national criteria of sustainable development (environment, social and economic).
- Revised all contents of the PDDs and verified use of appropriate baseline and monitoring methodologies.
- Advise local consultants on CDM methodological issues.
- Responsible for arranging for the meetings of Egyptian DNA (Bureau and Council)
- Verified conformity of PDDs with the Sustainable Development criteria of Egypt.

2007 - 2009

Vulnerability & Adaptation Manager

Central Department for Climate Change (CDCC)

Egyptian Environmental Affairs Agency (EEAA)

Ministry of Environment (MoE)

www.eeaa.gov.eg

- Governmental Officer, represented in the **Egyptian Delegation** to United Nation Conferences and meetings on climate change and related topics
- Member of the Secretariat of the National Climate Change Committee
- Responsible for coordination between national ministries/agencies to prepare the national strategy for vulnerability assessment and adaptation to climate change
- Team member of Second National Communication Project, responsible for reviewing the V&A chapter

2002 - 2007

Climate Change Specialist

- Member of Egyptian DNA
- Member of technical secretariat for National Committee on Climate Change
- Team member of preparing the proposal (enabling activities) of Second national Communication report submitted to GEF in both agriculture and adaptation sectors
- Projects:
 1. **2003-2006: Regional Capacity Development for Clean Development Mechanism (CD4CDM), funded by Netherlands**
Team member, responsible for creating preliminary Project idea Notes (PINs), Project Design Documents (PDDs) for CDM projects and scientific content of official website of Egyptian CDM, as well as share in capacity building for relevant sectors and promotion activities for CDM in Egypt.
 2. **2005-2008: Utilization of Solar Thermal Energy in Resorts and New Villages in Reclaimed areas, funded by Italy**
Project Editor, Deputy Manager, responsible for administrative and CDM related topics in the project
 3. **2005-2008: National Communication Support Program (NCSP), funded by**

GEF/UNDP

Team member, responsible for Mitigation and Vulnerability & Adaptation Assessment

4. **2005-2008: National Capacity Self-Assessment (NCSA) funded by GEF/UNDP**
Deputy Manager for Climate Change Sector, responsible for technical identification of crosscutting issues with other Rio Conventions (Biodiversity and Desertification)
5. **2007-2008: Development and demonstration of a process for producing Biodiesel from *Jatropha Curcas* seeds by enzyme extraction and ethyl transesterification, funded by Italy,**
Team member, responsible for administrative and CDM related topics in the project
6. **2006-2009: Egypt Second National Communication (SNC), funded by GEF**
Team member, responsible for GHG inventory and mitigation, as well as co-editorial of CDM activities chapter
7. **2008-2009: Excremental Cloud Seeding Project in Egypt, national funding**
Team member, responsible for administrative and share in management.
8. **2006-2007: "MEDiterranean food and agro industry applications of Solar COLing technologies" (MEDISCO), funded by European Commission**
Team member, responsible for administrative and management

1996-2002

Network Administrator, Modeler and Software Developer

Central Laboratory for Agricultural Climate (CLAC)

Agriculture Research Center (ARC)

Ministry of Agriculture & Land Reclamation (MALR)

www.clac.edu.eg

- Team leader of more than 30 researchers in CLAC during the implementation of climate change projects
- Deputized as a lecturer for academic course of "Information System and computer science" for faculty of agriculture- Azhar University for the academic years 99-2000/ 2000-2001 /2001-2002 /2002-2003/2003-2004
- Excellent background in computer science, system programming, and system analysis.
- Outstanding experience in the use and the application of internationally recognized computer programs on programming languages, Network Diagnoses and Web Designing.
- Associated with the Central Lab. for Agricultural Climate (CLAC) for more than 6 years as a Network Administrator (Win NT Server 4.0 – Win2000 Server and Win2000 Adv. Server),
- Associated with Egypt for Information Technology (EGYfit) "private sector Co." for 1 year as technical Support and Network Administrator, Software Developer
- Shared in CLAC website designing <http://www.clac.edu.eg>, and supervise CLAC database developer team.
- Have been selected as one of the team responsible for GHG inventory from agriculture sector in the Initial National Communication of Egypt to UNFCCC (1999); I was responsible for modeling, projections and shared in mitigation and Adaptation assessment report
- Projects:
 - **1996-1999: Egypt Initial National Communication (INC), funded by GEF**
Team member, responsible for emission calculation from agricultural sector and projection analyst, shared in mitigation and Adaptation assessment report.
 - **1997-2000: Irrigation Requirement Information System (IRIS), funded by USA**
Team member, responsible for mathematical model builder for climate change impacts on agricultural sector – software developer and network administrator
 - **2001-2002: Information Technology for the Arabian Peninsula (ITAP), funded by ICARDA**
Deputy Manager, responsible for mathematical model developing
 - **2001-2003: Establishment of Agrometeorological Database – funded by France**
Team member, responsible for database designing and developing web-based applications as well as shared in administrative and management
 - **2002-2004: Assessment of Impacts, Adaptation, and Vulnerability to Climate Change in North Africa: Food Production and Water Needs (AIACC) – funded by European Commission**
Team member, responsible for climate change adaptation assessment in agriculture sector as well as shared in administrative and management

b) Consultation Work (Part time):

Oct.2022 – Nov.2022

Sustainable Agriculture Investment and Livelihood Project (SAIL)*Senior Climate Change Consultant***The Project is funded by International Fund for Agricultural Development (IFAD) and implemented by the Egyptian Ministry of Agriculture & Land Reclamation**

Developing an assessment report that covers the SAIL Project activities to be presented during COP27 (Sharm El-Sheikh, Egypt, Nov 2022). The report provides an overall background on the project and climate change in Egypt as well as the climate change impacts on Agriculture Sector. The report highlighted the Climate Smart Agriculture Applications conducted by the SAIL Project including Aquaponics, Hydroponics and Kitchen Gardens and assesses the Pros, Cons, Lessons Learned and Policy Recommendations for each application.

Assessment of SAIL Project activities from a climate change perspective has been drafted in the report including adaptation and resilience, vulnerability assessment, adaptation measures, alignment with national Climate Change Strategy and with Sustainable Development Goals. Also, covers the mitigation and low emission related activities and provides estimated GHG emission reductions resulted by the SAIL Project activities.

Local and global financial related activities by SAIL have been summarized as well as the levels of awareness and targeted groups of the Project

Jun.2022 – Dec.2022

Gender and Climate Action Fast Track Initiative: Lead-up to COP27 in Sharm El-Sheikh*Senior Climate Change Consultant***The Project is funded by EBRD and implemented by Chemonics Egypt Consultants**

Provide consultancy services for the project: "Consultancy Support for the Gender and Climate Action Fast Track Initiative (GCAFTI): Lead-up to COP27 in Sharm El-Sheikh", which is funded by the European Bank for Reconstruction and Development (EBRD). The objective of the project details that "Under the leadership of Egypt, the GCAFTI will be piloted in the country with select private sector clients in the green sectors and where EBRD, AFD and AfDB have previously invested, with a special focus on clients in the Renewable Energy Framework, Agriculture and Infrastructure and gender mainstreaming within all of them. Furthermore, GCAFTI will also, under the guidance of Ministry of International Cooperation (MOIC), reach to national institutions such as the Ministry of Environment and the Department of Climate Change, National Council for Women (NCW), Ministry of Manpower, Egyptian Environmental Affairs Agency (EEAA) and other ministries and governmental agencies as guided by MOIC to draw best practices in fast tracking gender-responsive climate outcomes which other countries could also duplicate

The conducted activities include,

- Develop a climate change profile for the sectors of focus identifying risks, impacts and opportunities for businesses that could include women
- Analyze Egypt NDCs and climate strategy and identify entry points for gender inclusion
- Analysis linking the sectors of interest to the Climate Strategy 2050 including key joint targets and activities, among other aspects
- Identifying possible interventions for roadmap

Jan. 2019 – Sep. 2019

Study on the EU support provided at regional and bilateral level in the field of climate change in the Neighborhood South countries (2012-2018)"*Senior Climate Change Consultant- Key Expert (Cat. II)*

Implementing Agency: Project Planning & Management Ltd., DG Neighborhood and Enlargement negotiations, European Commission

Beneficiary countries:

Algeria, Egypt, Jordan, Lebanon, Morocco, Palestine, Tunisia

The study provides in-depth global assessment of the EU support provided on climate change in the European Neighborhood Policy (ENP) during the period 2012-2018. The assessment provides a general analysis of these interventions and draws lessons learned. The assignment feeds into the preparatory process of the future EU support to climate action in the Neighborhood South region in the forthcoming programming period under the European Neighborhood Instrument (ENI). Particular attention is paid to the interactions between regional and bilateral assistance in the policy areas related to climate change adaptation, mitigation, and resilience

Specific Objectives

1. To carry out a quality control of the application of Rio Markers to completed and ongoing regional and bilateral EU-funded projects on climate change in the Neighborhood South countries during the 2014-2018 period
2. To assess the performance of completed and ongoing EU-funded projects

- contributing significantly or mainly to climate change mitigation and adaptation (with particular focus on the latter) in the Neighborhood South countries during the 2012-2018 period, and to draw lessons for the design of future projects
3. To calculate the overall GHGs emissions reduction for actions marked as contributing significantly or mainly to climate change mitigation in the Neighborhood South countries during the 2014-2018 period
 4. To draw conclusions and formulate recommendations for the future

Mar. 2010 – May 2012

Increasing Adaptive Capacity to Climate Change in Arab Region Project

Implementing Agency: Islamic Development Bank/ Centre for Environment and Development for the Arab Region and Europe (CEDARE)

The project is aiming to strengthening capacities in the Kingdom of Saudi Arabia and Egypt for better assessment of their vulnerabilities and adaptation capacities to climate change; assisting the two countries in identifying suitable adaptive strategies and actions, both at the political and technical levels, and involving different stakeholders, to enable efficient and lasting adaptation to climate change; and promoting awareness and understanding of climate change global issues and their impacts and implications on the sustainable development of the Arab Region particularly in the Kingdom of Saudi Arabia and Egypt.

Focus is made on Egypt and Kingdom Saudi Arabia (KSA), to conduct two cases of studies, which may be implemented in other Arabian countries.

In charge of:

- Strengthening capacities in the Arab countries for better assessment of their vulnerabilities and adaptation capacities to climate change.
- Assisting Arab countries in identifying suitable adaptive strategies and actions, both at the political and technical levels, and involving different stakeholders, to enable efficient and lasting adaptation to climate change.
- Promoting awareness and understanding of climate change global issues and their impacts and implications on the sustainable development of the Arab Region
- Promote wider understanding of the global consequences and impacts of climate change and its implications on the Arab Region.
- Please detail your specific activities:
- Representing the Egyptian experiences in climate change adaptation and mitigation,
- Contribute to preparation of Egyptian work programme in increasing climate change adaptive capacity
- Contribute to establishment a roster of Egyptian experts in climate change
- Coordinate with project team in Saudi Arabia in relation to achievements of project activities
- Integration the final report of the project

Feb-2011 – Oct. 2012

Preparation of a regional climate change project under the Regional Action Programme ENPI South 2011

Implementing Agency: EU, EuropeAid Co-operation Office Programme Manager Climate Change/Environment, Centralized operations for Europe, the Mediterranean and Middle East

Beneficiary countries:

Morocco, Algeria, Tunisia, Egypt, occupied Palestinian territories, Jordan, Lebanon, Syria

Objective of ENPI South regional climate project "implemented as CLIMA-SOUTH" :

For the ENPI South regional action programme 2011, a regional climate change project in the order of 5 MEUR is envisaged. The global objective of this project will be to contribute to the implementation of the ENPI South RSP and RIP 2011-2013 insofar as climate change is concerned

In charge of:

- Get a good overview on **climate-related domestic policy developments** in the ENPI South partner countries
- Provide a **high-quality analysis** on lessons learned from previous regional and bilateral climate projects in the region
- See what elements of the **SKPI (Support to Kyoto Protocol Implementation)** project on-going in ENPI East 2008-2011 could be taken over in this planned ENPI South project.
- Summarize the **state of climate policy** co-operation between the EU and the partner countries in different relevant fora
- Provide advice on the **most important capacity and institutional building** needs in the partner countries, through direct conversations, organization and moderation of workshops and other meetings in ENPI South region, contacts with other international stakeholders, and other relevant means.
- Cover **mitigation as well as adaptation policies**

Submit an **Action Fiches as well as TOR for a service contract project** (or for a cooperation with an International Organization), with all necessary supporting documents according to EC standard procedures that will be communicated to the consultants at the beginning of this FWC

Jan 2007 – Mar 2009
