

COP24, Katowice (Pavilion H3)

IPCC Special Report on 1.5°C – Chapter 4

Thursday, 6 December (16:30 - 18:00)

Contact: Sarah Connors sarah.connors@universite-paris-saclay.fr

Chapter 4 discusses how the global economy and socio-technical and socio-ecological systems can transition to 1.5°C-consistent pathways and adapt to global warming of 1.5°C. In the context of systemic transitions across energy, land, urban and industrial systems, the chapter assesses adaptation and mitigation options, including carbon dioxide removal (CDR) measures, as well as the enabling conditions that would facilitate implementing the rapid and far-reaching global response. This session will discuss the main findings from the chapter, with presentations from IPCC authors and responses from external stakeholders. A panel discussion with questions from the audience will conclude the session.

COP24, Katowice (Pavilion H3)

IPCC Special Report on 1.5°C – Chapter 4

Thursday, 6 December (16:30 - 18:00)

Provisional Programme

Opening and Welcome		
16:30	Welcome and Introduction	Youba Sokona IPCC Vice-Chair
IPCC Special Report on 1.5°C – Chapter 4		
16:35-16:55	Key findings from Chapter 4 <i>15 mins talk with 5 mins Q&A</i>	Heleen de Coninck Chapter 4 Lead Author
16:55-17:10	Adaptation: incremental or transformational? <i>Deep dive presentation: 10 mins talk and 5 mins Q&A</i>	Reinhard Mechler Chapter 4 Lead Author
17:10-17:25	The finance and economics of the Special Report on 1.5°C <i>Deep dive presentation: 10 mins talk and 5 mins Q&A</i>	Jean-Charles Hourcade Chapter 4 Lead Author
17:25-17:35	Responses by panelists – 5-10 mins <i>[Green Climate Fund]</i> <i>Links to WGIII AR6</i>	Jim Skea [TBC] IPCC WGI Co-Chair
17:35-17:50	General discussion	
17:50-17:55	Closing remarks	Youba Sukoma IPCC Vice-Chair
