

## Workshop on IPCC Role, Activities and Findings 26 October 2019 at Academy of Sciences Malaysia

### IPCC WITH MALAYSIAN YOUTHS AND YOUNG PROFESSIONALS

The youth are the leaders of tomorrow. The world needs leadership on climate change and young people are stepping up to the challenge! This workshop presents the work and findings of the IPCC in a simple language. It also provides an opportunity for young people to discuss, understand and share ideas on issues pertaining to climate change that can be implemented at the national level.

1700-1730	Tea & End of Workshop

#### About the IPCC

The Intergovernmental Panel on Climate Change (IPCC) was created by the United Nations Environment Programme (UN Environment) and the World Meteorological Organization (WMO) to provide policymakers with regular scientific assessments on climate change, its implications and potential future risks, as well as to put forward adaptation and mitigation options. The IPCC reviews and assesses the most recent scientific, technical and socio-economic information produced worldwide relevant to the understanding of climate change. Currently, 195 countries are members of the IPCC and thousands of scientists from all over the world contribute to its work.
