

Challenges and Opportunities in inventorying GHG

Tuesday, 3 December, (18:30)

Contact: Sandro Federici

Short description (max 250 words): The use of higher Tiers methodologies is an opportunity for increasing accuracy, completeness and consistency of national GHG estimates, although it poses challenges in terms of complexity of data analysis, data handling and inferential statistics. Panelists will discuss such opportunities and challenges from examples taken from actual national GHG inventories.

Provisional Programme

Moderator (Thelma Krug, IPCC vice-Chair)		
Time	Description	Speaker
18:30	Opening Remarks/Welcome/Introduction	
	Presentations/Talks
