

Sustainable Development Compatibility with 1.5 and 2C pathways

December 4, 9:00 - 10:30

Contact: Monica Dean

Short description (max 250 words):

This moderated discussion will explore the pathways of 1.5°C and 2°C, and the potential synergies and trade-offs with sustainable development dimensions. Drawing from the recent Special Reports on Global Warming of 1.5C (SR15) and Climate Change and Land (SRCCL), experts from both reports will discuss the findings on the challenges and opportunities that can be found between sustainable development and climate mitigation and adaptation.

Provisional Programme

Moderator (name and title): Leo Hickman, Editor, Carbon Brief		
Time	Description	Speaker
9:00-9:05	Welcome/Introduction	Moderator
9:05-9:10	Opening Remarks	Hoesung Lee, IPCC Chair
9:10-10:10	Moderated Discussion on IPCC Report Findings	
	Findings from the SR15 The Special Report on Global Warming of 1.5C (SR15) looked at	THelma Krug, IPCC Vice-Chair Heleene de Coninck

	interactions of climate change and climate responses with sustainable development including sustainable development impacts at 1.5°C and 2°C, the synergies and tradeoffs of mitigation and adaptation with the Sustainable Development Goals/SDGs, and the possibilities for sustainable and equitable low carbon, climate-resilient development pathways.	
	<p>Findings from the SRCCL</p> <p>The Special Report on Climate Change and Land (SRCCL) looked at future scenarios as a framework for understanding the implications of mitigation and socioeconomics on land. The Shared Socioeconomic Pathways (SSPs) span a range of different socioeconomic assumptions and are combined with different levels of mitigation to provide a link between socioeconomic development, mitigation responses and land.</p>	<p>Zinta Zommers Koko Warner Shuaib Lwasa</p>
10:10-10:25	Q&A	
10:28-10:30	Closing Remarks/Summary	Leo Hickman
