

IPCC AR6 Synthesis Report Outreach Event in Korea

“IPCC AR6 Assessment: Key findings and policy implications”

IPCC approved and adopted AR6 Synthesis Report on March 2023. With the release of the Synthesis report, IPCC 6th Assessment was successfully completed with production of eight reports during eight years of intense work, assessing thousands of literatures on climate change, its risks, impacts, adaptation and vulnerability, and mitigation of climate change. The aim of this outreach event is to disseminate key findings of IPCC AR6 assessment and enhance science and policy interface toward climate change solutions.
