Description (max 250 words)

The event will focus on the most recent regional climate information for the European region based on the latest IPCC WGI AR6 relevant for impact and risk assessment. The climatic impact-drivers (CIDs) framework will be introduced and future projection of the most relevant CIDs, with their past trend observations and attribution will be highlighted for each of the 4 European AR6 regions. The events will be enriched by examples of CID projections at several global warming levels (1.5oC, 2oC and 4oC) illustrated by mean of the Interactive Atlas facility. The plenary discussion will be followed by a Q&A session in separated breakout rooms where specific topic in different languages will be discussed with the participants.

Agenda

- General intro on European Climate Change and CID's (guided by Factsheet Europe): Erika
- Importance of the WG1 climate information for WG2 assessment: Daniela
- Intro and brief demo of the Interactive Atlas: Richard and/or Maialen and/or Jose
- Examples of regional assessments
 - Eastern Europe : Svitlana
 - High latitudes: Irina
